Petition: Stop the visual suppression of account corpses!

Berlin, January 15, 2009

Dear Philip Rosedale,

In June 2007, the movement-for-account-corpses.de launched an online petition against the visual suppression of account corpses the way it is practised by you in your metaversum Second Life.

Our Germany based initiative accountleichenbewegung.de has had great response in the media, it was part of the Second Life exhibition 'Second Art', it was nominated for the "IBM Award for new media", it was awarded the CYNETart prize 2008, many avatars and real people signed the petition (which you can find enclosed). Now they all hope that there will happen something soon!

Therefore, in the name of all our supporters we would like to encourage you most strongly to start thinking about a visualization of your estimated 14 million account corpses. We, the movement-for-account-corpses.de, have already made substantial suggestions! (Have a look at the postcard.)

We are looking forward to hear about your ideas which you please send us, together with a solid plan of operation, as soon as possible.

It's our mission to connect us all to an online world that advances the account corpses' condition.

Yours sincerely

Muji Zapedzki
Founder of the movement-for-account-corpses.de
Headquarters in Second Life: Fishii 166, 153, 26
